

The T-65B X-wing starfighter is a fictional starfighter from the original Star Wars trilogy and the Star Wars expanded universe. They are depicted as the primary interceptor and dogfighter of the Rebel Alliance and the New Republic. The craft has been merchandised as a variety of toys, models licensed for use in games, novels and comics. The "lake" in which Luke Skywalker (Mark Hamill) crashes his X-wing in *The Empire Strikes Back* was only 3.5 feet (1.1 m) deep, requiring the creation of a rig resembling the starfighter sitting in the lake at an angle. The rig was built in hinged sections so it could be manipulated by frogmen to sink or rise, a key feature for the scene when Luke fails to levitate his ship from the water.
